

## **FM Radio Recorder**

### **Features:**

- Discover Music – Find Song Title, Artist and Other Information
- Record Radio Programming – Listen to the Entire Radio Playlist or Individual Songs
- Playback Recordings on PC or Portable Music Players
- Receive RDS/RBDS – Display Radio Text from FM Stations (only with Instant Radio application, not in Snaptune)
- Retractable Antenna Included

**No Subscriptions** – FREE FM MUSIC - listen to and even record FM radio broadcasts from stations in your local area and web radio from anywhere in the world with no subscriptions.

**RADIO FREEDOM** - The exclusive time-shift functions of the included Snaptune One software give you the freedom to listen to radio programming based on your schedule. You can pause, rewind and fast forward through live FM radio or web radio. Program the radio shows you want to record and listen to only the music you want and skip past the rest.

**FREE Artist Name and Song Titles** - Some radio identification services charge up to \$1 per song just to receive the artist name and song title. With Snaptune One, you never pay a dime to receive this valuable information about the music you love! Learn artist names, Song titles, view album art, artist news from Google, discover other music by the artist, locate concert tickets and more – FOR FREE.

**Web Radio Recording** – You can pay \$30 or more for a software application that will simply tune to web radio stations and record the audio. With FM Radio Recorder and Snaptune One, you can record multiple web radio streams simultaneously, identify the song and artist for FREE!
