

Pinnacle Studio 12 Plus

Accept HD format

Pinnacle Studio Plus works with HDV and AVCHD footage by preserving the quality of the original source all the way to the final output without transcoding. The flexibility of combining standard and high definition photo and video is available as well.

Built-in HD Disc Burning

Burn your designed movies on DVD and HD DVD format discs on standard DVD media. Besides, create Blu-ray format discs with full motion menu or make AVCHD format discs on standard DVDs to play on Blu-ray players.

Enjoy multi-track power without complexity

Pinnacle Montage automatically generates all the necessary titles, effects and animations.

Create multi-layer effects

Access to Picture-in-Picture, Chroma Key or A/B editing with two video tracks.

Mix your media together

Use all your media includes photos, video, and music in this editing software to create a special video.

It's all in the Timeline.

With its sleek, scalable interface makes it easy to use and refine the workflow in the video editing progress. Directly import your digital videos, photos and audio from a wide range of devices including DV, HDV and AVCHD camcorders, and digital still cameras. Automatic scene detection and clip creation gets your project off to a great start.

Optimized for performance

Discover the power of your computer where it can perform faster and provide smoother experience while you work and in your final output.

Real-time multi-track editing

Create advanced effects like Chroma Key, graphics overlay and Picture-in-Picture (PIP).

Key frame-able 2D/3D motion graphics

Pick from hundreds of effects and transitions, and preview them in full quality, even in HD. If you ever need more creative variety, add to your effects library with just a simple clicks.

Scorefitter® music generator

Automatically generate a rich soundtrack to match the length of your movie. Now there are more than 10 source tracks.

Web publishing simplified

In just One-Click share your movies with the world on popular web sites like YouTube and Yahoo! Video

Refined audio editing

New digital controls and monitors to add a dimension in sound to your movie.

Clean up and rejuvenate

Improve audio tracks, clean up video, enhance color, remove noise, and fix poor lighting to restore old, damaged footage.

Even more ways to share

Output movies to portable device such as Sony® PSP™, Apple® iPod®, DivX® certified players and even 3GP mobile phones. Export to Flash video too.

Built-in HD Disc Burning

Burn DVD, HD DVD and AVCHD format discs on standard DVD media. Natively author Blu-ray format discs with full motion menus.
